

Deer Resistant Plants

Deer will eat anything if they are hungry. The best approach is to use plant material that isn't appealing to consume. Typically plants with spiny or fuzzy foliage, a strong scent, and those known to have toxic properties aren't appealing.

Perennials

Anise Hyssop (Agastache)	Evening Primrose (Oenothera)	Myrtle (Vinca)
Aster	False Indigo (Baptisia)	Japanese Spurge (Pachysandra)
Baby's Breath (Gypsophila)	Ferns	Painted Daisy (Tanacetum)
